

# NEMASS<sup>®</sup>

## Valcom Enterprise Management and Security Software

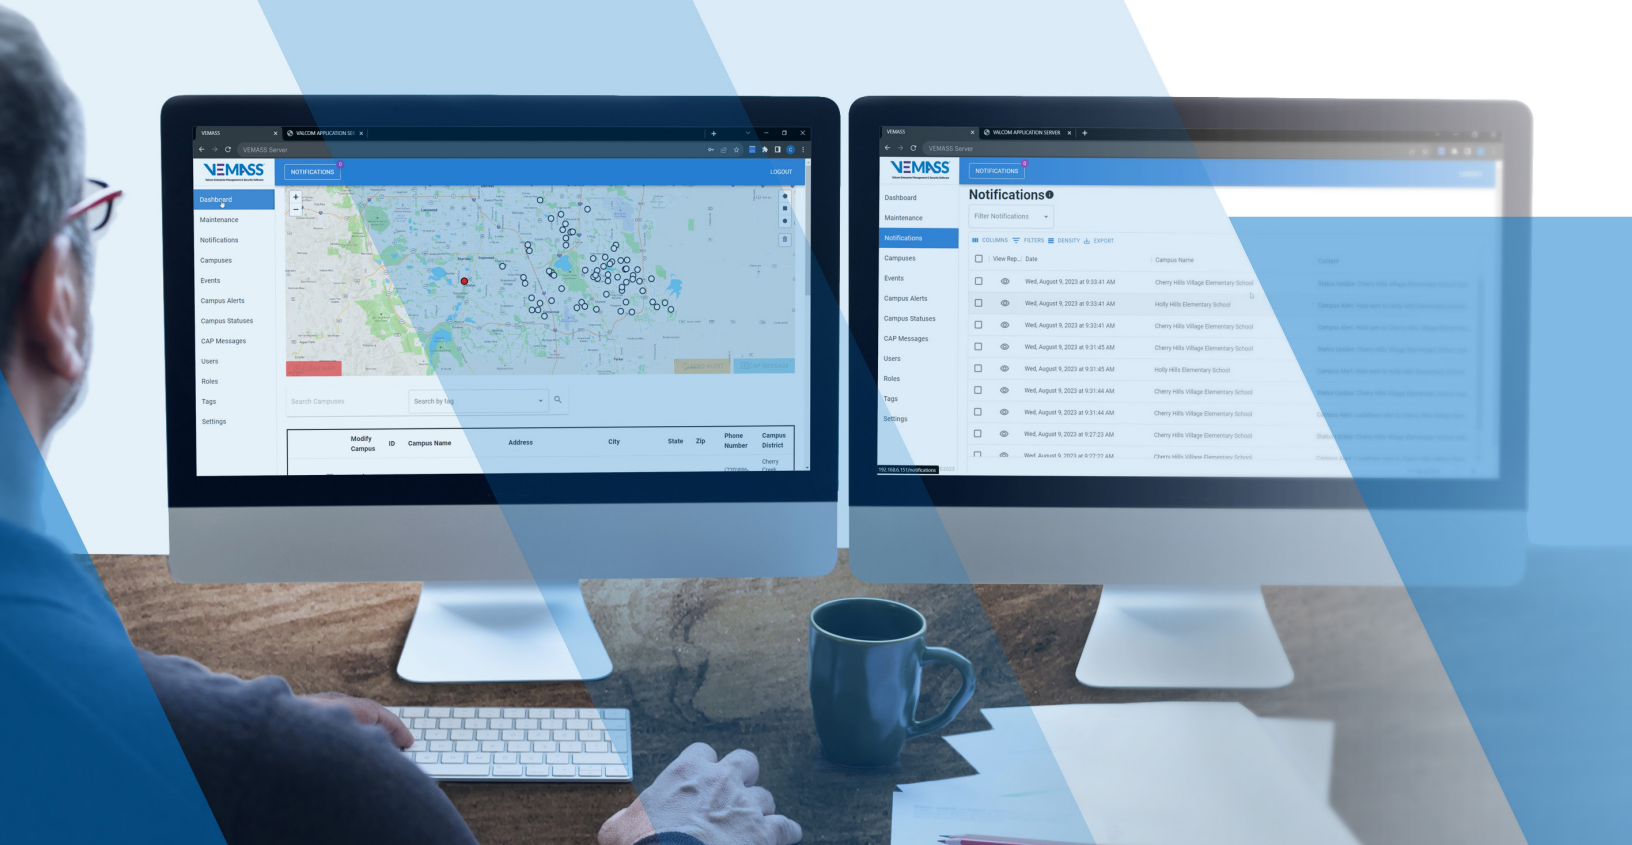

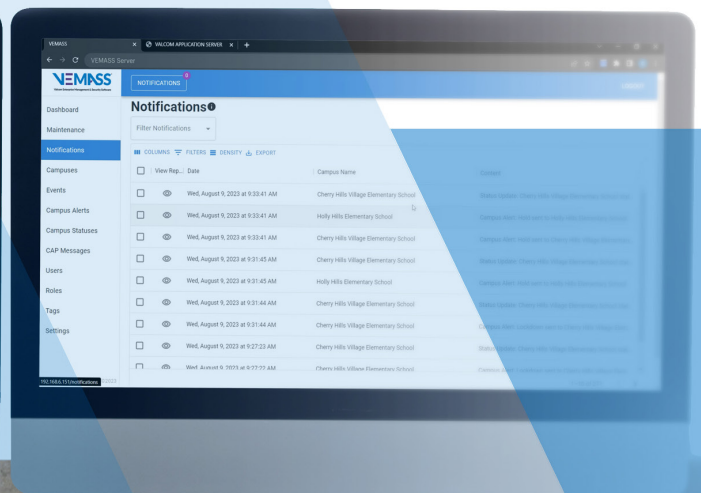

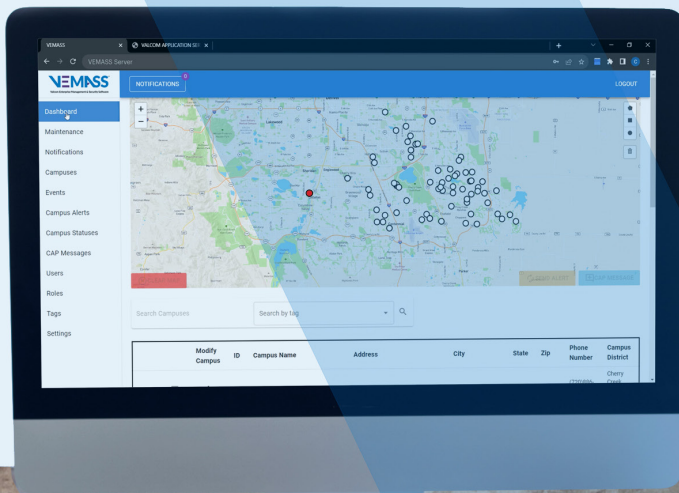

# Enterprise management and security software to interact with your entire Valcom System

VEMASS is a single pane of glass for all other Valcom solutions such as our IP6000 SiteManager®, V-Alert and Valcom Desktop Notification. Our solutions keep your organization up and running daily or during an emergency.

## Emergency Management

Emergency events are fluid situations and change minute-to-minute, VEMASS gives you complete visibility of all your locations allowing you to provide pertinent, real-time information such as emergency status, 911 alerting and lockdown confirmation, so you can **keep people safe and out of harm's way.**

## Day-to-day enterprise operations management

Real-time monitoring offers the ability to manage and communicate schedule changes such as early release or pre-recorded messages that can be quickly dispersed across an entire enterprise. Provide information where needed – when needed.

Receive real-time updates from any campus with IP6000 SiteManager® Software.

This enhances the speed and reliability of communication within your enterprise.

Our mission is to deliver daily and emergency communication solutions that deliver accurate information to global communities in a timely manner.

# Centralized Point of Access

VEMASS gives you a global view of all your systems across the entire enterprise. Your complete system in one view allows you to monitor devices in real-time. This proactive approach to system health ensures that devices are ready to receive day-to-day and emergency notifications.

## Troubleshooting & Reporting

VEMASS browser-based software allows enterprise-wide remote access to troubleshoot and resolve issues from one central location. Remote maintenance reduces travel and manpower expense while greatly increasing operational efficiency.

# Enterprise-wide Notification System

## System Health

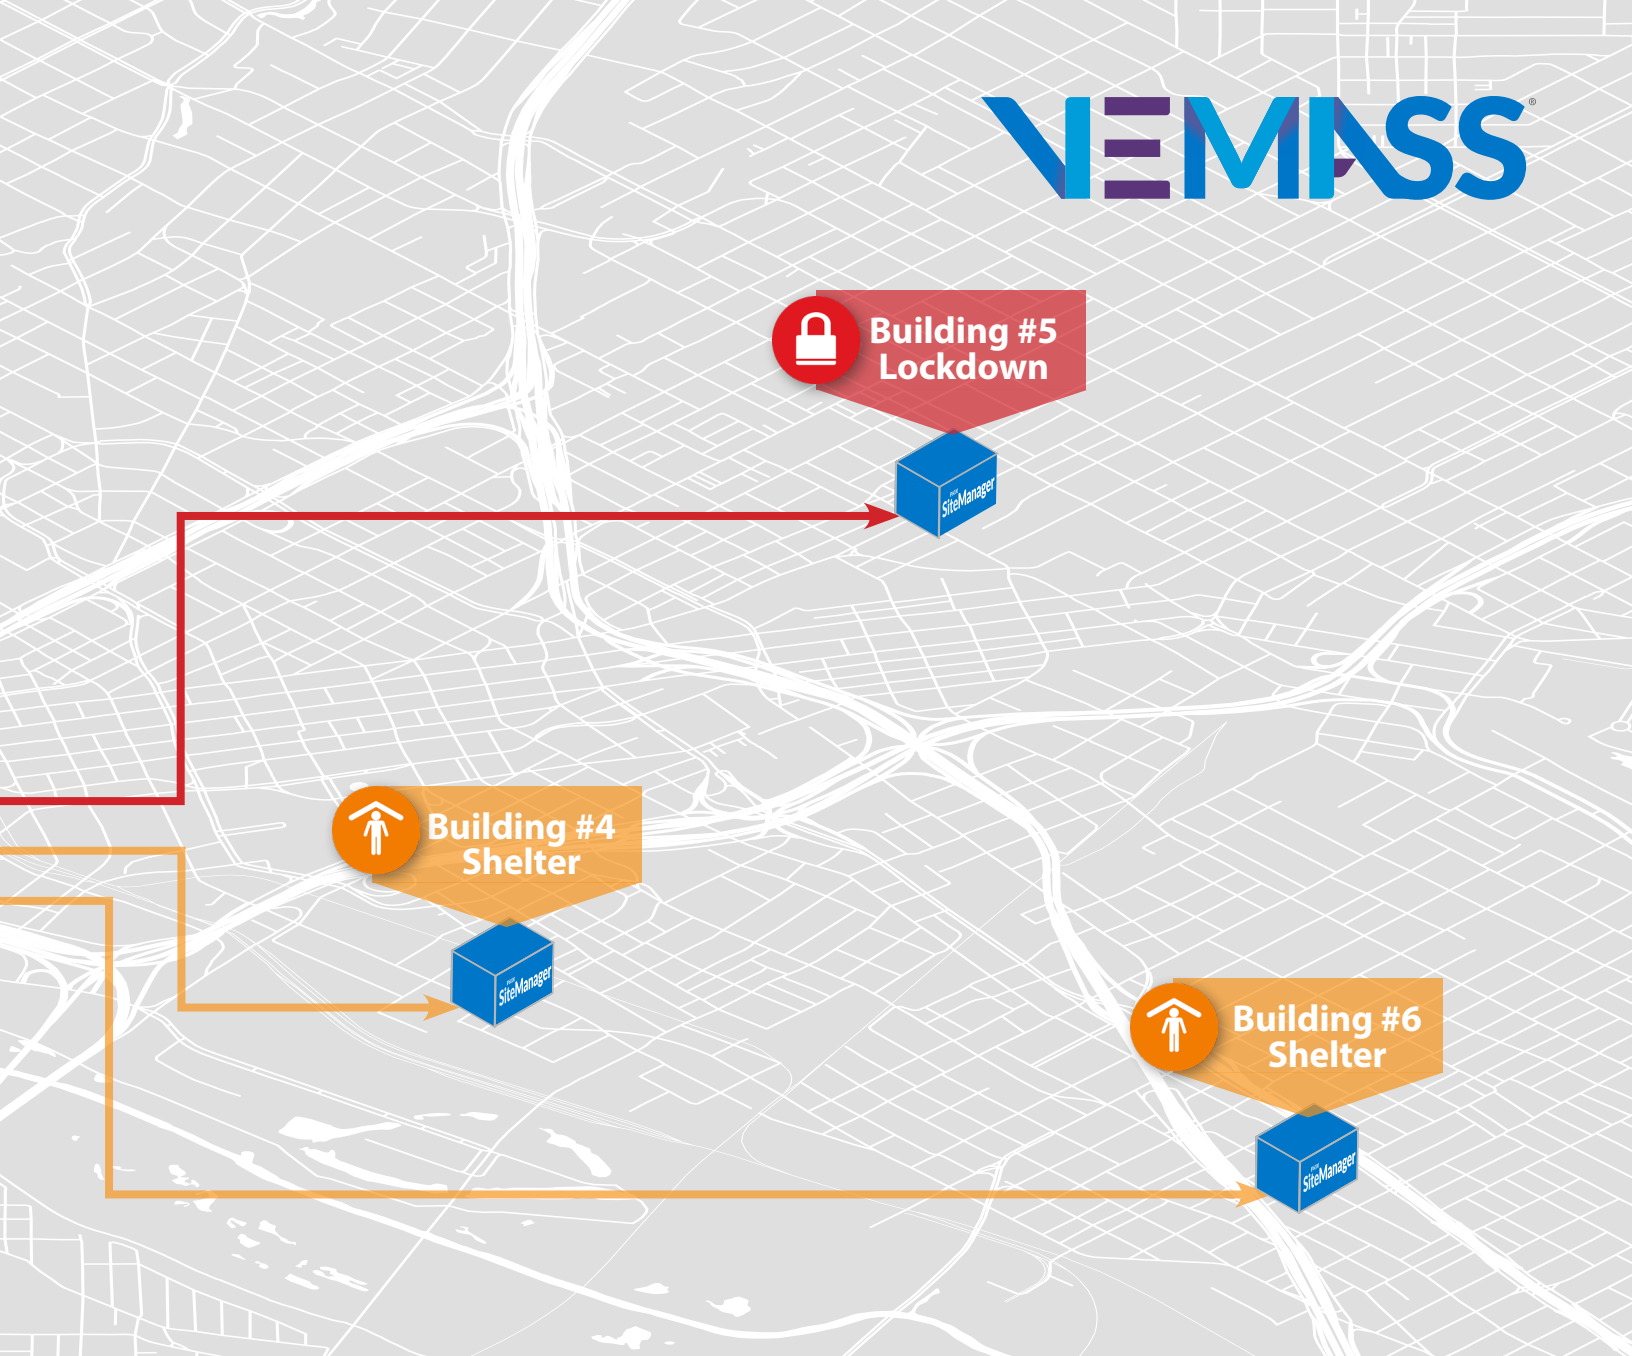

**Device Monitoring** – Immediately know when a device is offline

**Central Maintenance** – Manage Valcom audible/visual devices from a central location

**Reporting** – Export action items to distribute to the team

**System Control** – Sets zones and adjust volumes remotely from one location

**Remote Login** – Centrally login to local sites for localize specific programming

## Emergency

### Hold

Hold is followed when you need to keep the hallways clear.  
Example: **Stay in your room, office or area.**

### Secure

Secure protocol is followed when you need to activate safeguard for people in your organization. Example: **Get inside! Lock your doors!**

### Lockdown

Lockdown is used to secure individual rooms, keep occupants quiet and in place. Example: **Lockdown! Lights Out! Stay Quiet!**

### Evacuate

Evacuate protocol is used to move people from one location to another or out of the building. Example: **Evacuate immediately through the nearest exit.**

### Shelter

Shelter protocol is used to take immediate shelter where you are. Example: **Tornado! Seek shelter away from windows and doors**

The **VEMASS Basic** package allows you to set up a campus directory with the added advantage of remotely accessing IP6000 SiteManager® Software.

### Alerts Package

The VEMASS Alerts Package encompasses various interactive features that can be purchased as one package or separately.

**Revolutionize your safety** by giving you enterprise-level alerting and situational awareness in a single user interface.

**Bridge the information gap**, stay informed with the Campus Status Notification feature, and receive real-time updates from any campus with IP6000 SiteManager® Software.

**Initiate automated messages** to neighboring campuses with the automated actions feature that prompts them to take action based on their message.

Quickly select multiple campuses through the **Campus Geofencing** feature.

### System Health Package

Monitor all IP devices and software components across all your campuses and ensure your system is operational with the **Site Supervision** feature.

Go beyond monitoring and gain the capability to securely log in to a single campus location with the **Site Troubleshooting** feature. This capability gives you the ability to troubleshoot from an enterprise level.

### à la carte - Choose what you need

Valcom offers a range of customizable communication solutions allowing customers to select the features and capabilities that best meet their specific needs. This flexibility ensures that Valcom's solutions can support day-to-day communication needs and emergency situations, helping keep the global community safe, informed, and on schedule.

Need a path to upgrade your current system to increase your reach?  
VEMASS paves the way for you to upgrade your current Valcom system with the latest technology.
