Mass Notification	Visual Notification	Intercom	Clocks	Valcom IP HelpPoints	Paging

Mass Notification

Moving pieces put together

Valcom's mass notification platform is capable of integrating existing tools to become one unified, flexible and powerful platform.

Multiple endpoints, one message

Our mass notification system enables you to send live or prerecorded messages and emergency notifications to various endpoints such as loudspeakers, LED signs, emails and desktop pop ups.

We are here to help

Valcom can help to guide you through the process of designing your new mass notification system. From start to finish, we are here to help!

Visual Notification

Seeing is knowing

Because we know not everyone is actively listening, or able to hear clearly, integrating IP LED signage and strobes as part of your notification system enables you to reach more people with more messages.
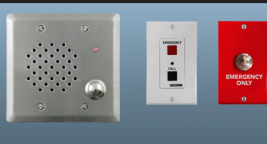

Sound or sight

Valcom's IP LED signs are able to broadcast visual and voice notifications with prerecorded messages in different colors, font sizes and transitions. Our strobes are easily synchronized to notify individuals.

We are ready for your call

Valcom's experienced team is ready to have a conversation with you on what is the best way to implement visual notification into your overall communications plan.

Intercom

Vandal and weather-resistant systems

Intercom stations are used at multiple points inside and outside your facility and they are vandal and weather-resistant to protect against Mother Nature and vandals.

Protect your people, property and assets

Easily integrate Valcom intercoms into your existing network for interoperability with other systems like access control cameras for ease of monitoring your access points.

We love the challenge

Your challenges are complex, but our leadership in the communication field enables us to find the right solutions specifically for you. It's what we've been doing for over 40 years.

Clocks

Flexible

Valcom offers a variety of clock sizes and styles in analog or IP, in either wired or wireless configurations.

Scalable

Our synchronized clock system can be implemented in a single building or across your entire organization to provide a unified time standard.

Synchronized

Link directly to the time change via network time protocol to reduce overall maintenance costs that are associated with keeping traditional clocks synchronized.

We have the time

Whatever your needs are for a clock system, Valcom can assist in providing the timekeeping solution for you.

Valcom IP HelpPoints

Always on duty

Valcom IP HelpPoints can be strategically placed in areas such as parking lots, pathways or remote areas of your campus to allow individuals who need assistance to have direct contact with your campus safety office or the local police department with just the push of a button.

Protect more

Our solutions also encompass emergency call boxes that can be located throughout resident halls and academic buildings with one push of the button to notify police.

We have you covered

Integrate with an existing network or telephone system as a call station/helppoint and an emergency broadcast point.

Paging

Always clear

Valcom's voice paging systems are designed to fit the needs of your organization and give you the right amount of coverage in all the right places.

Just the right fit

No matter the size or layout of your facility, Valcom has the solution to tackle any complex overhead paging need. Our diverse portfolio of paging products can help you to deliver crisp, clear voice paging, break/shift-change tones, and background music.

We have the team

More than 200 Valcom employees in our state-of-the-art facility build more than 700 products that help you communicate with the people throughout your organization.

Our Markets

VALCOM

Schools	Healthcare	Transportation	Higher Education	Commercial/Industrial	Retail	Government/DOD

Schools

Synchronize your time

Running on schedule means you must have a comprehensive communication network in place that is capable of coordinating clocks and bell schedules from one remote area, so you can focus on what you do best – teaching the next generation.

Modernize how you communicate

Legacy systems only take you so far. You need to be able to reach not just classrooms, but also reach your entire district.

Let us guide you

Let Valcom show you how to integrate your systems so sharing information across geographical locations is now possible.

Healthcare

Comply with Federal regulations

Communication is critical to medical facilities. With our solutions, you can communicate to multiple departments or issue a code blue, all while maintaining compliance with OSHA and ADA.

Privacy matters

Hospitals, doctor's offices and clinics need a variety of communication tools including overhead paging, visual messaging, emergency mass notification, and remote Valcom IP HelpPoints. Spot SoundMasking technology can help to uphold patient confidentiality and HIPAA Laws.

Let us help you

Let Valcom help navigate through your communication needs to connecting systems across multiple areas.

Transportation

Information transparency is key

Travelers need information. Transportation hubs have a challenging task to communicate to passengers regarding schedules, delays, and it needs to prioritize those messages so they are sent out instantly.

Safety is everything

A traveler's safety is of high importance. Transportation hubs need to ensure that passengers are kept informed and safe by using voice paging and visual notification systems.

Let us show you a new way to communicate

Communication systems for transportation hubs can be a challenging venture. But our expertise in designing and integrating systems is unparalleled. With our expertise you have full interoperability of all your systems.

Higher Education

Solutions for the toughest challenges

Today, campuses are becoming more and more expansive. Valcom has solutions to help you maximize existing infrastructure and address any deficiencies to give you a complete notification system to keep your staff, faculty and students safe, informed and on schedule.

Proven reliability

For more than forty years, Valcom has provided the highest quality paging and mass notification products available.

Let us share our expertise

Valcom has helped institutions design and implement the most flexible and responsive notification systems available. We will work with you every step of the way!

Commercial/Industrial

We speak business

In today's world, the speed of business is perpetually increasing. Every day needs to be as productive as possible. This task can be difficult because not all of your employees can be reached using the one-size-fits-all method.

Flexibility is key

Every business is unique. Valcom can help design, implement, and quickly deploy voice paging and mass notification systems that uses existing infrastructure.

Let us share our experience

Valcom's vast experience in notification technologies like voice paging, LED signs, automated shift/break tones and synchronized clocks can help you develop a solution that improves daily operations and be better prepared to handle emergencies.

Retail

Your lifeblood

Being able to communicate with your employees and customers is vital to your business' success. The customer experience goes beyond the interaction between them and your sales staff.

More than simple paging

Many retailers have incorporated paging speakers into their stores and distribution centers to keep employees and consumers informed, provide an atmosphere of comfort for their customers, and most importantly, to be able to send out real-time information during an emergency situation.

Let us help you choose

Valcom can help you choose what's good for your facility to offer the best customer experiences as well as help keep your employees and customers safe and informed.

Government/DOD

Protect those that protect

Communication is the pillar to any organization. U.S. military bases and government facilities are no exception. You have thousands of personnel moving about your facility on any given day; in and out of barracks and offices in constant motion.

Wide-area coverage

With the transient nature of bases, your communication system needs to instantly reach anyone, anytime, any place!

Let us help you prepare

Valcom's paging systems offer the reliability and flexibility that military/government facilities need. Our systems can easily integrate with your current phone systems and provide the capability to broadcast audible/visual information over a wide geographical area.
