The Audio Interface and the Microphone Panel are two Valcom products that can be used together or separately.

The Microphone Page Panel is a handheld push-to-talk microphone that allows you send live pages and record up to 8 messages over the paging systems for use in security offices and guard stations.

The V-1096 Audio Interface is used to connect the V-9908 to any Valcom one-way amplified speaker, horn or to various Valcom page controls. The V-1096 is included with the V-9908,

The Audio Interface and the Microphone Panel can be used together or separately.
