Speaker/Clock Kit

Valcom's InformaCast® and Intrado Revolution® compatible Speaker/Clock Kit endpoints are powered by a single network PoE port and provide a modern speaker and modern clock. Also included in the kit is a 50-foot preconnected cable that links the devices together. No backbox or baffle is required.

These Speaker and Clock Systems ensure an attractive solution for any environment such as educational facilities, offices, campuses, hospitals, commercial and industrial facilities, high security government and military areas.
