

Ringer Horns

Valcom's Analog Ringer Horns are used to send tones over an organization's paging system to alert individuals of shift changes, breaks or important announcements. The Valcom Analog Ringer Horns can be used for interior or exterior applications and are ideal for machine shops, outdoor work yards, factories and warehouses.

The V-9925A is a one-tone horn designed to broadcast a loud warble as long as an input signal is present. The V-9945A is a two-tone ringer horn that provides amplified electronic tones for signaling in large, noisy or outside areas.

Built-in tone generator and volume control
