Technical Specifications

V-DSP Large LED Display Package

- Includes a VCLED Large LED Display and V-ROM-D Display Driver Card
- Green text display normal calls
- Red text displays emergency calls

Provides visual indication of incoming and connected intercom calls

Description:

The V-DSP Large LED Display Package includes a V-ROM-D Display Driver Card and a VCLED Large LED Display. The V-ROM-D plugs directly onto, and is powered through the V-CPU4 card. It provides a serial port output for Station Message Detail Reporting (SDMR) reports and, when used with the VCLED Large Display, also provides visual identification of system time and date as well as incoming call identification. This large LED display is ideal for mounting in an office area to display call information.
