Valcom V-9972 Connection Guide
with Crown 135MA/160MA

V-9972

135MA/160MA

Switch 1 to OFF

Set Switch 1 to "Line" (Off) position.
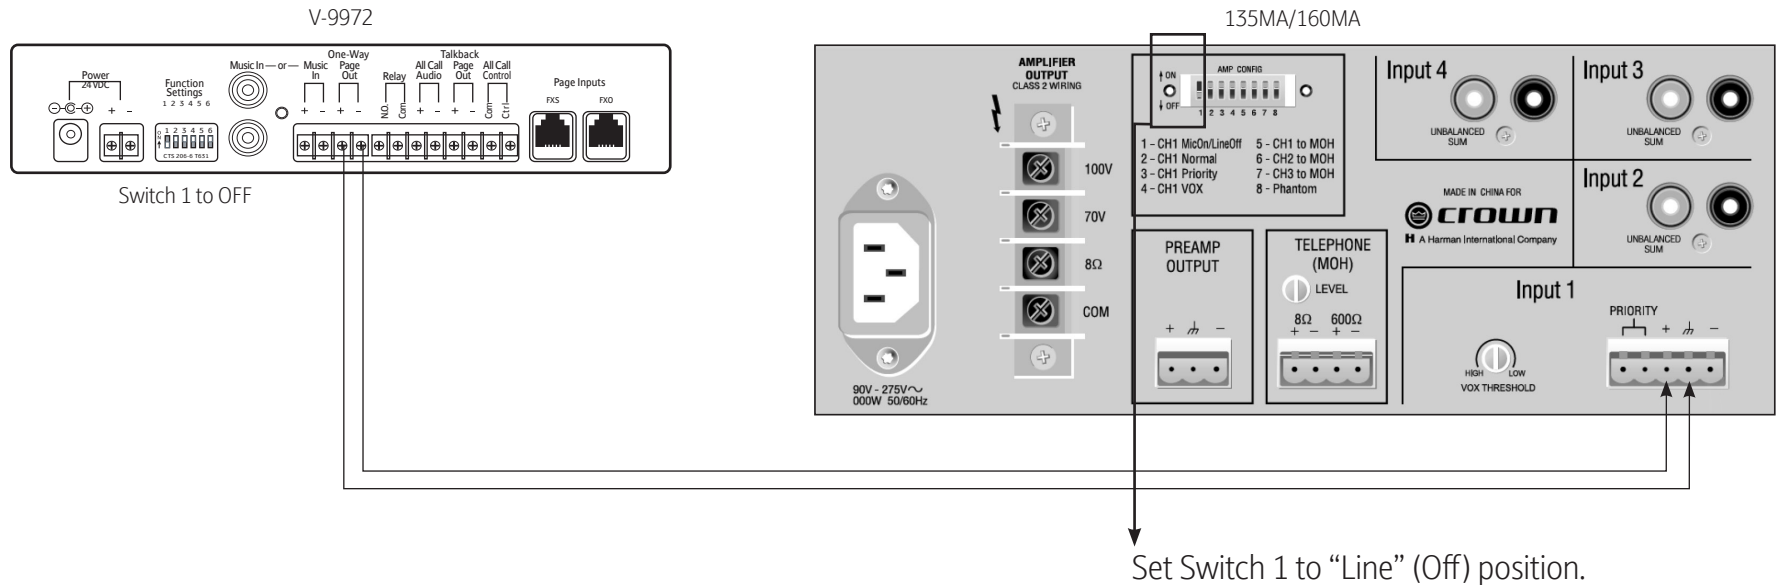

NOTE:

If needed, the Relay output from the V-9972 may be connected to the PRIORITY input terminal to duck other inputs during a page.

The V-9972 One-Way Page Out may also be connected to the Input 2, 3 or 4 connections if Input 1 is used for other purposes.
