

IP Call Station

Valcom's IP Vandal-Resistant Talkback Call Station allows communication to Valcom's FXO, FXS units and SIP-compatible telephone systems via an IP network. The IP Call Station combines a rugged talkback paging horn with a vandal-resistant enclosure for added protection. The VIP-9890AL-CB is ideally suited for indoor or outdoor installations in for structures such as parking garages, prison common areas and transportation terminals. Horn is for indoor/outdoor, however, the network interface is mounted indoor.

Allows communication to SIP enable telephone system via an IP network.
