Valcom IP Mass Notification System Solutions Now Rated “Avaya Compliant”

- *Valcom’s IP Loudspeaker Paging and Mass Notification Systems are compatible with Avaya IP Office 6.0, Avaya Aura® Session Manager 6.0 SP1, and Avaya Aura® Communication Manager 6.0.*

FOR IMMEDIATE RELEASE: October 28, 2011

Roanoke, VA — Valcom, Inc., an industry leader in design and development of IP Loudspeaker Paging Systems and Mass Notification Systems, today announced that their IP One-Way Speakers, IP Talkback Speakers and PagePro IP Gateways are all compliant with key Internet Protocol (IP) telephony solutions from Avaya, a global provider of business collaboration systems, software and services.

Valcom’s IP Loudspeaker Paging and Mass Notification Systems provide solutions to help businesses communicate more effectively and efficiently by utilizing the IP network and are now compliance-tested by Avaya for compatibility with Avaya IP Office 6.0, Avaya Aura Session Manager 6.0 SP1 and Avaya Aura Communication Manager 6.0.

“Providing a compliance-tested solution for Avaya’s standards-based systems demonstrates Valcom’s commitment to the Avaya community”, said John Mason, president of Valcom. “IP technology on standards-based systems from Avaya provides the flexibility to design mass notification and loudspeaker paging systems that can be adapted to almost any situation.”

Valcom is a member of the Avaya DevConnect program—an initiative to develop, market and sell innovative third-party products that interoperate with Avaya technology and extend the value of a company’s investment in its network.

As a Gold member of the program, Valcom is eligible to submit products for compatibility testing by the Avaya Solution Interoperability and Test Lab. There, a team of Avaya engineers develops a comprehensive test plan for each application to verify whether it is Avaya compliant. Doing so enables businesses to confidently add best-in-class capabilities to their network without having to replace their existing infrastructure—speeding deployment of new applications and reducing both network complexity and implementation costs.

“Valcom’s product offerings enable Avaya customers to augment their telecom system with additional state-of-the-art mass communication capabilities,” said Eric Rossman, vice president, developer relations, Avaya. “Testing through our DevConnect program gives Avaya customers the assurance that these solutions are compatible with Avaya technology.”

About Valcom

Since 1977, Valcom has been the leader in high quality loudspeaker paging and mass notification systems along with telecommunication system enhancement products providing solutions for the most sophisticated communication requirements. Valcom's extensive offerings are manufactured in state-of-the-art facilities in Roanoke, Virginia and include page control interfaces, VoIP LAN/WAN connectivity, ceiling/wall speakers, paging horns, analog/digital clocks (wired, wireless and IP PoE) and door entry systems. Valcom is the standard product offering for major telephone companies and the overwhelming choice of Fortune 500 Companies. Valcom's pre-engineered technology uses existing infrastructure (CAT 5/6 cable or existing networks) eliminating costs associated with additional wiring.
