

Valcom, a world leader in providing the highest quality talkback intercom and loudspeaker paging systems, introduces the Valcom MultiPath™ Intercom System specifically designed to meet the sophisticated communication needs of Industrial Facilities.

Valcom MultiPath™ systems offer high quality internal communication and a multitude of features that are easily configured to suit the most advanced requirements. Valcom MultiPath™ systems include user-friendly administration software that allows facilities to easily manage the changing needs of the voice communication system – whether the needs change daily, weekly, monthly, or annually!

Valcom MultiPath™ Intercom System provides the ultimate in cost saving installations by utilizing the existing telecom/datacom infrastructure (CAT 3/5/5e/6). System expansion, flexibility and reliability are added benefits to using existing cable which makes Valcom MultiPath™ the only communication system of choice!

## System Overview

## System Operation

- Multiple talkpaths for better system efficiency
- Provide quick response to emergency situations
- Up to 360 zones provide ultimate flexibility
- Provide localized area or facility-wide coverage
- Use any facility telephone for paging, intercom or emergency messages
- Notify everyone for quick evacuation or response to critical situations
- Initiate call from work area to front office
- Reduce installation costs by using existing telephone/ datacom low-voltage wiring

## Benefits

Use coded tones to signal emergency conditions or direct actions  
 Notify everyone for quick evacuation or personnel relocation  
 Send music program to specific group of rooms or entire facility  
 Continue internal paging communications during power failures  
 Synchronize facility clocks with change tones  
 Identify visitors and unlock doors from your desk telephone  
 Adjust each speaker location for proper operating level  
 Communicate with a specific group without disturbing other areas  
 Allow building-wide notification of pending caller after hours  
 Use existing facility wiring for lower installation costs  
 Reduce response time to generate emergency page  
 Alert everyone that a page is about to begin  
 Each group can be individually configured  
 Find people who are away from their desk  
 Push intercom button to report emergencies to front office  
 Enhance access control system with communications at locked doors  
 Distribute change tone to any group or entire building  
 Complement ADA paging compliance with lights and signs  
 Easily interfaces with VoIP and Session Initiation Protocol (SIP)  
 Identify and alert personnel to emergency situations

## Easy & Cost Effective Talkback Speakers

### 2' X 2' TALKBACK LAY-IN CEILING SPEAKER

#### W/BACKBOX V-CTL
