

Valcom, a world leader in providing the highest quality loudspeaker paging systems, introduces the Valcom MultiPath™ System specifically designed to meet the sophisticated communication needs of manufacturing facilities.

Valcom MultiPath™ systems offer high quality internal communication and a multitude of features that are easily configured to suit the most advanced requirements. Valcom MultiPath™ systems include user-friendly administration software that allows facilities to easily manage the changing needs of the voice communication system – whether the needs change daily, weekly, monthly, or annually!

Valcom MultiPath™ Intercom System provides the ultimate in cost saving installations by utilizing the existing telecom/datacom infrastructure (CAT 3/5/5e/6). System expansion, flexibility and reliability are added benefits to using existing cable which makes Valcom MultiPath™ the only communication system of choice!

System Overview

System Operation

- Provide Employee Alarm Systems to meet OSHA Standard 1910.165 requirements
- Provide localized area or facility-wide coverage
- Minimize response time by using any telephone for paging or message activation
- Provide quick response to emergency situations
- Notify everyone for quick evacuation or response to critical conditions using tones
- Reduce installation costs by using existing telephone/ datacom low-voltage wiring

Features

Alert & Evacuation Tones
 All Call Emergency Paging
 Battery Back-up
 Control of Facility Clocks
 Door Entry / Security Management
 Monitor remote Equipment
 Multiple Building Paging Integration
 Night Ring Signal after hours
 OSHA Employee Alarm Notification
 Paging over existing premise wiring
 PBX Paging Access
 Pre-Announce Tone
 Public Address and Paging
 Remote call-in of emergencies
 Security Intercom / Paging
 Time and Work Tone Notification
 Voice over Internet Protocol (VoIP)

Benefits

Use coded tones to signal emergency conditions or direct actions
 Notify everyone for quick evacuation or personnel relocation
 Continue internal paging communications during power failures
 Synchronize facility clocks and payroll systems with paging work tones
 Identify visitors and unlock doors from your desk telephone
 Listen in to any area or zone to monitor running machinery
 Network multiple buildings to create one system
 Allow building wide notification of caller after hours
 Provide priority paging access for emergency message distribution
 Use existing facility wiring for lower installation costs
 Reduce response time to generate emergency page
 Alerts everyone that a page is about to begin
 Find people who are away from their desk
 Simply push intercom button to report emergencies to security desk
 Enhance access control system with communications at locked doors
 Inform workforce of breaks, start of work, or scheduled activities
 Easily interfaces with VoIP and Session Initiation Protocol (SIP)

Easy & Cost Effective One-Way Speakers
