

## Paging System Questionnaire

Rev 1.04

*The information obtained from this questionnaire is needed in order to use the Configuration Software Tool.*

---

Zones are areas that need to be paged independently of each other. All call and group call are combinations of discrete zones. How many total zones are required? \_\_\_\_\_

Is there a requirement to provide voice communication at building entrances? \_\_\_\_\_  
(Add one talkback zone per entrance) How many? \_\_\_\_\_

Is there a requirement to control electric door locks at these entrance locations? \_\_\_\_\_ How many? \_\_\_\_\_

Is there a requirement to correct secondary clocks to synchronization with shift change and break tones? \_\_\_\_\_

Is there a requirement for an emergency all call microphone? \_\_\_\_\_

Will the paging system be integrated with a telephone system? \_\_\_\_\_

If so, does the system have a loop start C.O. line port available for each talk path? (1 to 4) \_\_\_\_\_

If not, provide up to 4 standard caller ID phones per talk path for paging system access. \_\_\_\_\_

Will this system utilize a V-PDP for convenient access and control of system inputs and outputs such as music, microphone, tone control, etc? \_\_\_\_\_

Is there a requirement for an electronic LED display in the administration area to indicate paging system activity? \_\_\_\_\_

Will the system administration be accomplished via modem, LAN or direct connection? \_\_\_\_\_

Will the system be wall or 19" rack mounted? \_\_\_\_\_

How many of the zones will be located in ADA areas of rescue? \_\_\_\_\_

Will announcements be initiated from any areas in close proximity to paging speakers or horns? \_\_\_\_\_

If so, will a digital feedback eliminator be required to eliminate the possibility of feedback squeal? \_\_\_\_\_

Do any of the areas designated to receive page announcements suffer from extremely variable noise levels? \_\_\_\_\_

If so, would an automatic volume control to automatically control horn or speaker volume be a valuable addition to these areas? \_\_\_\_\_

Will it be necessary to extend page zones or system talk paths via the facility LAN or WAN? \_\_\_\_\_
