Dear Customers**Happy New Year from Valcom!**

2003 brings exciting changes at Valcom which focus on making you more competitive!

[Valcom's new website](#) provides easier access to product and applications information and the [Library](#) now includes all Valcom product sales and installation information. In addition, [Industry Feature Guides](#) offer ideas on system features and benefits specific to particular application requirements.

The [Technical Support](#) and [Design Assistance](#) areas of the new website features troubleshooting guides and system design tools to assist in design, layout, and installation.

As the market looks toward [Emergency Paging and Voice Notification Systems](#) to protect people in the workplace, remember that Valcom paging solutions utilized structured cable wiring topologies which makes it the best solution for almost any customer.

Thank you for viewing Valcom's first ez-Newsletter. We welcome your [comments and suggestions](#) on how to improve this newsletter to better benefit your business.

New Product News**New Noise Sensing Volume Control With Remote Microphone Provides Added Flexibility And Simplifies Installation.**

The V-9933A Noise Sensing Volume Control monitors the ambient noise level(s), then automatically adjusts the page volume. It has been re-designed to monitor either a single noise area or to be used with remote microphones to monitor and average multiple noise environments. Large, noisy areas may require multiple noise sensors for accurate automatic volume control.

The new V-9934 remote microphone extends the coverage that a single V-9933A can provide. Up to 4 remote V-9934 microphones can be connected on a single pair of wires to each V-9933A.

New Message-On-Hold System Costs 30% Less And Is Enhanced With Increased Message Length And Flash Memory Reliability.

The V-9982 Message On-Hold System now provides 8 minutes of message playtime. Messages are now stored using flash memory, eliminating long term battery maintenance replacement costs. Signal processing circuitry enhances sound quality ensuring professional sounding customer announcements. The V-9982 is a turnkey package, which comes with a pre-recorded announcement tape and also includes a certificate for a free professionally recorded, "Thank you for holding" music tape with you company name as the greeting. Sales and Industry News**Make Emergency Overhead Paging Part Of Every Telephone Proposal.**

Every business needs an overhead paging system that instantly notifies personnel of an emergency situation. A paging system is the best alternative to notify building occupants of crisis or other emergencies. OSHA states that all employers with over 50 employees must have an employee alarm system to alert occupants of pending danger or disaster. [Learn More.](#) [Back To Top](#)

New Market Opportunities For Overhead Paging Systems Unveiled.

The best way to grow your business is to expand into new markets. Valcom has designed 12 Industry Paging Applications that provide a product list along with system ideas that address specific industry groups. Use these guides to determine what Valcom paging features are of interest to your customers. They also provide a quick summary of industry paging hot buttons that can be used when making presentations or laying out systems. Visit our new Industry Feature Guides section of our updated WEB Site. [Learn More.](#) [Back To Top](#)
