[New VP-12124 24 VDC, 12 AMP Power Supply costs 25% less.](#)

## Sales and Industry News

[V-9422 Spot SoundMasking Speaker provides patient privacy protection required by HIPAA standards.](#)

[HOT SALES TIP: Using VIP-800 LAN/WAN adapter to connect remote building/area paging zones without using dedicated wires or cables.](#)

Under the heightened risk of terrorism, U.S. businesses are reacting by initiating emergency plans to protect their employees and their companies. Never has there been a greater need for emergency paging systems in the workplace. An overhead paging system provides safety at a very reasonable cost. To see how emergency paging can help you provide your customers with a valuable safety solution, go to our [Voice Notification](#) page.

HIPAA privacy issues are a hot topic in Healthcare news. See how the [V-9422 Spot SoundMasking Speaker](#) can help provide your medical customers with patient privacy protection. "HIPAA. It's the Law".

Valcom is committed towards innovations that provide creative and cost effective solutions for your customers. Our Web Site provides a list of the [many features and benefits our products provide our customers.](#)

Installing jobs on time and within estimated hours is a high priority to maintain profitability. Valcom's new [VoIP LAN/WAN paging adapters](#) gets paging and intercom signals from point to point using the existing premise data network. You can substantially reduce your installation costs in large multi-building facilities by using the data network to distribute overhead paging loudspeaker signals without having to find or run new wiring. Link facilities for overhead paging and intercom anywhere on the LAN/WAN. Send the paging signal across the street or across the world!

The [V-9022 2'x2' Lay-In Ceiling Speaker](#) continues to be a great choice in helping you finish jobs on time. Installers can easily complete entire paging system installation without having to wait for the ceiling tiles to arrive. Simply drop the Lay-In speakers into the ceiling grid, terminate connections, test the system and walk away!

## New Product News

**Updated [V-2924A](#) now features [V-2928 Time Event Scheduling](#) option: Play tones through the paging system automatically without using external clock.**

The [V-2928 Feature Option Card](#) plugs into the V-2924A option slot. When installed, tones may be automatically played through the paging system to provide signaling for shift changes and clean up periods in the workplace. In addition, [the V-9927A](#) multi-tone generator can provide up to four (4) tones to satisfy even the most demanding applications. Using an optional external message storage unit, prerecorded messages can be sent out automatically by the system time clock. The V-2924A internal clock can be synchronized from an external facility payroll system to ensure work shift signals and time clocks are synchronized. No longer do you have to buy an external master clock to provide time control. The Windows software tool provided integrates all time programming options and other system programming parameters to provide simple user setup and ongoing maintenance changes. **New and improved, [V-9964 Stacking Feedback Eliminator](#) provides multiple users with simultaneous recording and paging operation at no extra cost.**

The [V-9964 Stacking Feedback Eliminator](#) now features two inputs for user access from any PBX trunk port. This product eliminates busy signals on heavily used paging systems and also prevents acoustic feedback. System can record two new user messages simultaneously while a third message is playing. A priority override input provides access to emergency paging operation. Four units can be interconnected to provide up to 8-user message recording capacity. Even with all this added performance the V-9964 is priced the same as the old single channel Feedback Eliminator. [Learn More](#)     [Back To Top](#)

**New [VP-12124 Switching Power Supply](#) costs 25% less.**

The [VP-12124](#) is a 12 AMP, 24 VDC, wall mounted power supply ideally suited for high powered/loud environment paging jobs. This new product can be used with control head-end equipment or some high-powered paging loudspeaker applications. This 83% high efficiency green technology supply can be easily backed up with any UPS system.

System Design Note: When using high powered horns, make sure to properly calculate power requirements and cable runs. For assistance contact Valcom Technical Support.

UL/CSA/TUV power limited approved. [Learn More](#)     [Back To Top](#)

## Sales and Industry News

**[V-9422 Spot SoundMasking Speaker](#) provides patient privacy protection required by HIPAA standards.**

The HIPAA standards require healthcare providers to safeguard the privacy and integrity of health information. Overhearing private patient conversations may place the provider at risk of non-compliance with this federal regulation. The [V-9422](#) helps to provide reasonable safeguards to protect patient confidentiality by lowering the intelligibility of what people can accidentally hear. The speaker provides an invisible privacy conversation barrier to keep conversations private in offices, hallways, conference rooms and reception areas. The [V-9422](#) provides privacy protection at a newly reduced cost. Easily installs into 2x2 ceiling grid. [Learn More](#)     [Back To Top](#)

**HOT SALES TIP: Using [VIP-800 LAN/WAN](#) adapter to connect remote building/area paging zones without using dedicated wires or cables.**

Valcom's VoIP paging adapters can help you solve those tough customer applications that require paging access from remote locations. The [VIP-800 VoIP](#) adapter uses your existing customer's data network to transport overhead speaker paging signals without needing dedicated structured cable runs to get there. Imagine connecting remote campus paging systems for facility wide evacuation from the central security command area without new wires. Imagine using your IP telephone sets to dial any specific building area paging zones without needing dedicated wiring to do so. Your loudspeaker paging network can be local or nationwide. Valcom VoIP adapters provide system solutions to expand the paging services you offer your customers. [Learn More](#)     [Back To Top](#)
