Keeping time accurate and consistent throughout a large facility is easy with Valcom’s new IP PoE Clocks — simply add a clock to any location on the network via RJ-45 connection. Power to the clock is provided by Power-Over-Ethernet (PoE) eliminating the need to add costly power outlets. Installation is easy and inexpensive and allows quick and easy relocation of clocks throughout a facility.

**Consistent and accurate time across an organization maintains efficiency and smooth company operation.**

**Manufacturing Facilities** – Synchronized time promotes adherence to schedules keeping the entire team consistently meeting productivity goals.

**Healthcare** - Daily healthcare requires synchronized time schedules which are critical for patient care and timely delivery of medications.

**Schools & Universities** - Accurate timekeeping is crucial in transitioning students from one class to the next. Since access control/security systems lock at certain times all across a campus, synchronized campus-wide timing becomes critical.

**Valcom IP PoE Clock Features:**

- Set Automatically by NTP (Network Time Protocol)
- 10/100BaseT Ethernet Compatible
- DHCP or Static IP Addressable
- Power over Ethernet (IEEE 802.3af)
- No Master Clock Required
- Simple User Control for:
  - IP Configuration
  - NTP Server Address
  - Time Zone Offset From UTC, Daylight Savings Time
  - Time Display, 12/24 Hour Format
  - Status Reporting
- Easily Up-Load Firmware Upgrades
- Industrial Grade Metal Housings
