**i love u guys** FOUNDATION®

Examples of standard response protocols shown are **i love you guys.org's** suggestions.

**IP6000 helps you free up valuable resources by automating functions with a single click. Send consistent messages across your school or district and perform other daily paging and notification.**

# ▶ Lockdown & Emergency Preparedness

When emergencies happen, the situation can escalate quickly. Actions taken in the first few seconds are critical and can be lifesaving. Valcom's IP6000 software solution is a key instrument in preparing for potential threats whether those threats are man-made or weather related. Preparation  helps you deliver real-time information to people within your organization so they can stay safe and informed during an emergency situation.
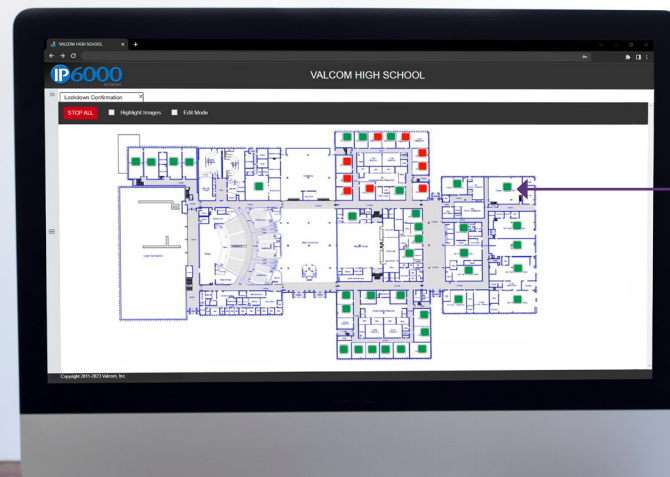

Valcom Speaker-with-Text & Flasher Alerting

**Lockdown confirmation**

Visually identify rooms confirmed in lockdown and where the threat may be.

🟩 **Lockdown confirmed**

🟥 **Lockdown unconfirmed**

# ▶ Daily Communications

Schools run more efficiently with a daily communication system in place. Morning announcements keep the school day running on time and hassle free. The IP6000 software allows you to set and amend your calendar throughout the year. Sync your bell schedule, clocks and automate announcements, all of which can be controlled from the school or district level.

## Versatility

You can leverage existing messaging systems with IP6000 to create one seamless notification platform working in concert to deliver time sensitive information to people throughout your organization.

- **Efficient daily communications**

- **School automation for repetitive events**

- **Browser-based calendars and bell schedules**

- **Time collaboration and time management**
