

V-9972 UNIVERSAL PAGING INTERFACE

INTRODUCTION

The V-9972 Universal Paging Interface is designed to provide access to paging systems from an analog station port (FXS, PABX), PABX loop start trunk port (FXO) or SIP (Session Initiation Protocol) voice over IP connections.

SPECIFICATIONS

Access Methods

- FXS extension
- PABX station extension
- Electronic key system line key
- PABX loop start trunk port
- Standard telephone
- SIP (Session Initiation Protocol)

Electrical Specifications

FXO Input

Ring Detect Voltage 13.5V Min REN 0.2

FXS Input

DC Open Circuit Voltage
DC Feed Circuit

DC Differential Output Resistance
Ringing Amplitude (nominal, open circuit)
Ring Frequency
Audio Sense Release:

-48V Nominal
45mA Max
60-640 Ohms
108V peak
20Hz
Programmable
0-600 Seconds

Programmable 0-3600 Seconds

Talkback Page Out (FXO Output)

Impedance: 600 Ohms
Page Level Output: -10dBm Nominal

One Way Page Out

Time Out Release:

Impedance: Min. 8 Ohms
Page Level: -10dBm to 0dBm
Music Level: -17dBm to 0dBm
Music Input Impedance: 10k Ohms

-23dBm to 0dBm Answer Verification Tone: User Programmable Form A Contacts: 24VDC, 1.0 Amps

Power:

Power Input: 24VDC, 600mA (not included)

These products are intended for use with a UL Listed power source marked "Class 2" or "LPS" rated 24VDC. All interconnected ITE are intended for intra-building.

Features

- Use with SIP (Session Initiation Protocol) VoIP PBX
- Use with Valcom multi-zone page control unit with FXS or analog station ports (DTMF signaling only)
- Use with Valcom handsfree page units for talkback paging
- Multiple units may be connected for multi-zone paging with all call behind a PABX
- Background music, stereo or mono input; music mutes during page
- Volume controls for background music and tones
- Security code option to restrict page access
- Store & Play feedback eliminator option
- Multiple disconnect options
- Page verification tone
- Customizable Page alert tone
- Drive up to 150 one-way amplified speakers on 8 Ohm output (one-way output)
- Web interface for programming extended functions

The following features can be enabled with additional license purchase:

- Additional options for full compatibility with Valcom IP endpoints
- SIP expanded to 4 extensions, with Night Ring and Store & Play on all lines

Dimensions/Weight

Single unit:

9.25" W x 10.12" D x 1.72" H

(23.49cm W x 25.70cm D x 4.36cm H)

Weight 2.5 lbs (1.134 kgs)

Two units mounted for 19" Rack:

19.0" W x 10.12" D x 1.72" H

(48.26cm W x 25.70cm D x 4.36cm H)

Weight 5.1 lbs (2.313 kg)

Environment

Temperature: 0 to +50°C Humidity: 0 to 80% (non-precipitating)

CALITION: To reduce the risk of electric shock Do not remove cover No user serviceable parts inside. Refer servicing to qualified service personnel.

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit.

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying

IMPORTANT SAFETY INFORMATION CONSIGNES DE SÉCURITÉ IMPORTANTES

- Read these instructions.
 Lisez ces instructions.
 Keep these instructions.
- Conservez ces instructions
- 3. Heed all warnings.
- Respectez tous les avertissements.

 4. Follow all instructions.
 Suivez toutes les instructions.
- 5. Do not use this apparatus near water
- Ne pas utiliser cet appareil près de l'eau.
- 6. Clean only with dry cloth. Nettover avec un chiffon sec
- Netury and a continuous sec.

 7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

 Ne pas bloquer les ouvertures de ventilation. Installer formément aux instructions du
- 8. Do not install near any heat sources such as radiators, heat registers, stoves or other por inistain real any real sources such as laciators, near registers, soves or other apparatus (including amplifiers) that produce heat.

 Ne pas installer à proximité de sources de chaleur telles que radiateurs, registres de chaleur, poêles ou autres appareils (y compris les amplificateurs) produisant de la chaleur.
- Challeuti, Delets ou duries appareirs by courtins les arithmicateurs) procussant de la crialeur.

 9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade and the third prong are provided for your safety. If the provided plug does not fit into your outlet consult an electrician for replacement of obsolete outlet.

 Ne pas contourner le dispositif de sécurité de la fiche polarisée ou de mise à la terre. Une fiche polarisée nossède deux lames dont une plus large que l'autre. Une fiche polarisée nossède deux lames dont une plus large que l'autre. Une fiche polarisée nossède deux lames dont une plus large que l'autre. - Ne pas contourner le disposant de securite de la liche pointaise du de l'inite à la terre. Onte fiche polarisée possède deux lames dont une plus large que l'autre. Une fiche de terre a deux lames et une troisième broche de mise à la terre. La lame large et la troisième broche sont fournies pour votre sécurité. Si la fiche fournie ne rentre pas dans votre prise, veuillez consulter un électricien pour le remplacement de la prise obsolète. 10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles and the point where they exit from the apparatus.
- 11. Only use attachments/accessories specified by the manufacturer.
- Nutilisez que des fixations / accessoires spécifiés par le fabricant.

 12. Use only with the cart, stand, tripod, bracket or table specified by the manufacturer or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

- 13. Unplug this apparatus during lightning storms or when unused for a long period of time. Débranchez cet appareil pendant les orages ou lorsqu'il n'est pas utilisé pendant une
- longue période de temperant les origies ou disquir in les pas utilises periode longue période de temperant les origies ou disquir in les pas utilises periode les temperants.

 14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way. Such as when the power supply cor damaged, liquid has been spilled, objects have fallen into the apparatus or the apparatus has been exposed to rain or moisture and does not operate normally or has

Confiez toute réparation à un personnel qualifié. Une réparation est nécessaire lorsque l'appareil a été endommagé de quelque façon. Par exemple lorsque le cordon d'alimentation ou la fiche est endommagé, du liquide a été renversé, si des objets sont tombés dans l'appareil ou le appareil a été exposé à la pluie ou à l'humidité et ne fonctionne pas normalement ou s'il est tombé.

Precautionary Designations

- **WARNING-To Reduce The Risk Of Fire Or Electric** Shock. Do Not Expose This Apparatus To Rain Or Moisture
- **AVERTISSEMENT Afin de réduire les risques** d'incendie ou de décharge électrique, évitez d'exposer le système à la pluie ou à l'humidité.

- Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.
- L'appareil ne doit pas être exposé à des égouttements et éclaboussures et aucun Objet Rempli de liquide, comme vase, ne doit être placé sur l'appareil.

FCC Information

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area may cause harmful interference in which case the user will be required to correct the interference at one's own expense.

General Mounting Information

- A) Elevated Operating Ambient If installed in a closed or multiunit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (Tma) specified by the manufacturer. B) Reduced Air Flow - Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment is not compromised.
- C) Mechanical Loading Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- D) Circuit Overloading Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.
- E) Reliable Earthing Reliable earthing of rack-mounted equipment should be maintained.

Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power

F) Equipment only suitable for mounting at heights less than or equal to 2m (6.56').

Power Requirements

The V-9972 requires 24 Volt DC power. Power may be connected using either the barrel connector or two screw terminals located on the back panel. The recommended power supply is the VP-624D, or other 24vdc power supply providing a minimum of 600 mA.

INSTALLATION

Regulatory Information

This equipment is to be installed only in restricted access areas (dedicated equipment rooms, equipment closets or the like.

When using this equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons including the following:

- 1. Never install telephone wiring during a lightning storm.
- 2. Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- 3. Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- 4. Use caution when installing or modifying telephone lines.

Mounting

Wall: Use the wood screws provided to attach the brackets to the wall. For surfaces other than wood, use hardware appropriate for the surface (not included). With the brackets securely attached to the wall, attach the V-9972 to the brackets, using the included hardware. (See Figure 1)

Rack: Two V-9972 units may be joined together and installed into a 1U rack slot. Using Figure 2 as a guide, attach the interlock brackets and end mounting brackets to each of the V-9972 units, then mount the combined units into an available rack slot.

Connections

Front Panel

The front panel of the V-9972 has the following controls:

- Monitor is a 3.5 mm headset jack for monitoring audio being sent to the output ports.
- Music volume control adjusts the output level of the background music to the output port.
- Tone volume control adjusts the output level of the page pre-announce tone.
- Status LED indicates the operating status of the V-9972.
 - Green indicates powered on and idle
 - Amber indicates Page in progress
 - Red during the bootup sequence, or to indicate a fault condition
- Ethernet is an RJ45 ethernet connection with two status LEDs:
 - Green: (Link) Indicates Ethernet connection when illuminated.
 - Yellow: (Activity) Indicator flashes to indicate network activity

Rear Panel

The rear panel of the V-9972 is located behind a removable cover and contains the signal connections.

- Power connections are provided with two options.
 Either the barrel connector or the two screw terminals may be used.
- Function Settings is a 6-position DIP switch for setting feature options. The settings are described more fully in this document.
- Music In provides two methods for connecting a background music source. Either the stereo RCA jacks or the screw terminals may be used. Stereo signals on the RCA jacks will be combined to mono.
- One Way Page Out is the audio output for speakers or amplifiers. The background music and paging audio will output on these two terminals.
- **Relay** is a normally open relay connection which closes when a page is active.
- All Call Audio is the audio input connection for accepting audio from other V-9972 controllers when the controllers are used in a multiple-zone arrangement.
- Talkback Page Out is the output connection providing FXO signaling to establish connection to a page controller. This connection is typically used with multi-zone page controllers.
- All Call Control is used in conjunction with the All Call Audio connection when used with other V-9972 controllers in a multiple-zone arrangement.

Page Inputs

- FXS provides FXS signaling. This is used with a single line telephone or PBX loop start trunk port.
 Dial tone is provided from this port. This port is active when SW 6 is ON.
- FXO provides FXO signaling. This is used with an FXS Station Port and will answer inbound calls signaled by ring voltage. This port is active when SW 6 is OFF.

Setup

Basic options to set the Input and Output ports on the V-9972 must be done using the DIP switch options noted previously in this document. Other basic settings can also be accomplished using the DIP switches. Additional programming can be accomplished using a touch-tone phone connected to the FXS port or through the web interface of the V-9972. Separate documentation on using these features is available on the Valcom web site.

Function Settings DIP Switch

Output Port Selection (SW 1)

Two output connections are available on the V-9972. The Talkback Page Out connection provides FXO (loop-start trunk) signaling. The One Way Page Out connection provides a standard tip/ring audio output. The default level of the One Way Page Out is -10dBm, but can be changed in software to +2.2 dBm for applications that require the higher output level.

| SW 1 | Talkback Page Out | One Way Page Out |
|------|-------------------|------------------|
| ON | Enabled | Disabled |
| OFF | Disabled | Enabled |

Silence Timeout Selection (SW 2 & 3)

Silence Timeout indicates how many seconds the V-9972 will stay active after the audio input has stopped. This can be used to disconnect a call after the caller has stopped speaking. Three values are available with the switch settings; additional options are available in software programming.

| SW 2 | SW 3 | Timeout |
|------|------|--|
| OFF | OFF | 8 Seconds |
| OFF | ON | 4 Seconds |
| ON | OFF | 2 Seconds |
| ON | ON | Software control (default: no timeout) |

Absolute Timeout Selection (SW 4 & 5)

Absolute Timeout indicates how many seconds the V-9972 will stay active for any caller. When the timeout setting expires, the call is disconnected. Three values are available with the switch settings; additional options are available in software programming.

| SW 4 | SW 5 | Timeout |
|------|------|--|
| OFF | OFF | 128 Seconds |
| OFF | ON | 16 Seconds |
| ON | OFF | 8 Seconds |
| ON | ON | Software control (default: no timeout) |

Input Port Selection (SW 6)

Input Port selects which of the Page Input RJ11 jacks is active. The ports are labeled FXO and FXS to indicate the type of signaling provided. The FXS port detects off-hook condition and provides dial tone to the circuit. The FXS port can be used with a standard phone or loop-start trunk port. The FXO port is a loop-start trunk port and can be used with a Station Port or FXS on a PBX.

| SW 6 | Page Input FXS | Page Input FXO |
|------|----------------|----------------|
| ON | Enabled | Disabled |
| OFF | Disabled | Enabled |

^{**} The V-9972 must be power cycled for any DIP switch changes to take effect. **

TECHNICAL ASSISTANCE

When trouble is reported, verify that power is being supplied to the unit and there are no broken connections. If a spare unit is available, continue to troubleshoot by substituting the spare unit for the suspected defective unit.

Assistance in troubleshooting is available from the factory. When calling, you should have a VOM, several clip leads, a telephone test set available and call from the job site. Call (540) 563-2000 or visit our website at http://www.valcom.com.

The V-9972 is not field repairable. Valcom, Inc. maintains service facilities in Roanoke, VA. Should repairs be necessary, attach the company name, address, phone number, contact person and the nature of the problem. Send the unit to:

Valcom, Inc. Repair and Return Dept. 5614 Hollins Road Roanoke, VA 24019-5056

WARRANTY

Warranty information may be found on our website at www.valcom.com/warranty
