

# Call-In Switches

Valcom's Call-In Switches provide remote call capability for emergency and informational calls as well as access control for your organization. They are designed to work with Valcom's page control units and intercom systems and are ideal for classrooms, laboratories, operating rooms and offices.

The unique feature of the Call-In Switch with Privacy (V-9320) allows you to have the talkback feature and maintain the privacy of your surroundings after the call has ended.

Remote call capability for emergency and informational calls
