

Valcom's VL520 7-Color LED Speakers-with-Text Sign and Flashers

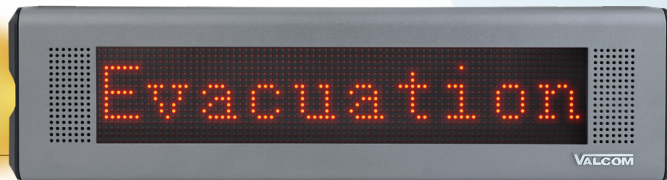

20-inch wide

IP PoE Speakers-with-Text
and Flashers

VL520BK-F-FC Black housing

VL520M-F-FC Metallic housing

7 color LEDs

The newest innovation in Valcom's speaker-with-text is brighter, lighter, and more versatile than before.

The VL520 Color sets a new standard in design – lighter, more colorful, and multilingual.

Available in an array of seven colors, including all primary hues and green, cyan, white, and magenta. The VL520 fully supports Spanish and other languages and seamlessly accommodate accented characters.

Perfect for environments where both display and audio are paramount, the VL520 Color is your go-to solution. With its customizable low-power mode, you can opt for a fixed brightness setting or programmable mode, ensuring optimal energy efficiency tailored to your needs.

The VL520 Color seamlessly integrates with ancillary devices such as the Threat Level Indicator, call buttons, and an additional speaker, offering a comprehensive solution for your audio and visual needs.
