Healthcare Solutions

Valcom's solutions are meticulously crafted to address medical facilities' unique communication challenges. Our comprehensive offerings encompass overhead paging, visual messaging, and emergency mass notification systems. Whether disseminating routine announcements or swiftly alerting personnel and patients during emergencies, our solutions are designed to streamline communication processes while adhering to stringent OSHA and ADA regulations and upholding patient confidentiality.

With Valcom, medical facilities can enhance operational efficiency, improve emergency response times, and foster a safer environment for staff, patients, and visitors.

On-Premise Alerting Needs

Emergency Notification

Code Blue: Easily tie your Nurse Call system to Valcom's communication devices.

Lockdown & Evacuations: Notify personnel of missing patients, fires, severe weather.

Non-Medical Emergencies: Instantly send emergency alerts to areas of your facility.

Daily Communication

Public Address: Automate routine announcements, prioritize code calls, emergency alerts.

One Click Simplicity: Send one message to multiple devices with a single click.

Desktop & Mobile Alerting: Send critical alerts to Android, iOS devices and desktops.

Scheduled Tone: Automate shift changes and tones.

System Health: Monitor your Valcom system and troubleshoot maintenance issues.

ADA Compliance Communication: Communicate both audible and visual alerts to meet ADA compliance using Valcom's visual signs, call stations, and emergency towers.
