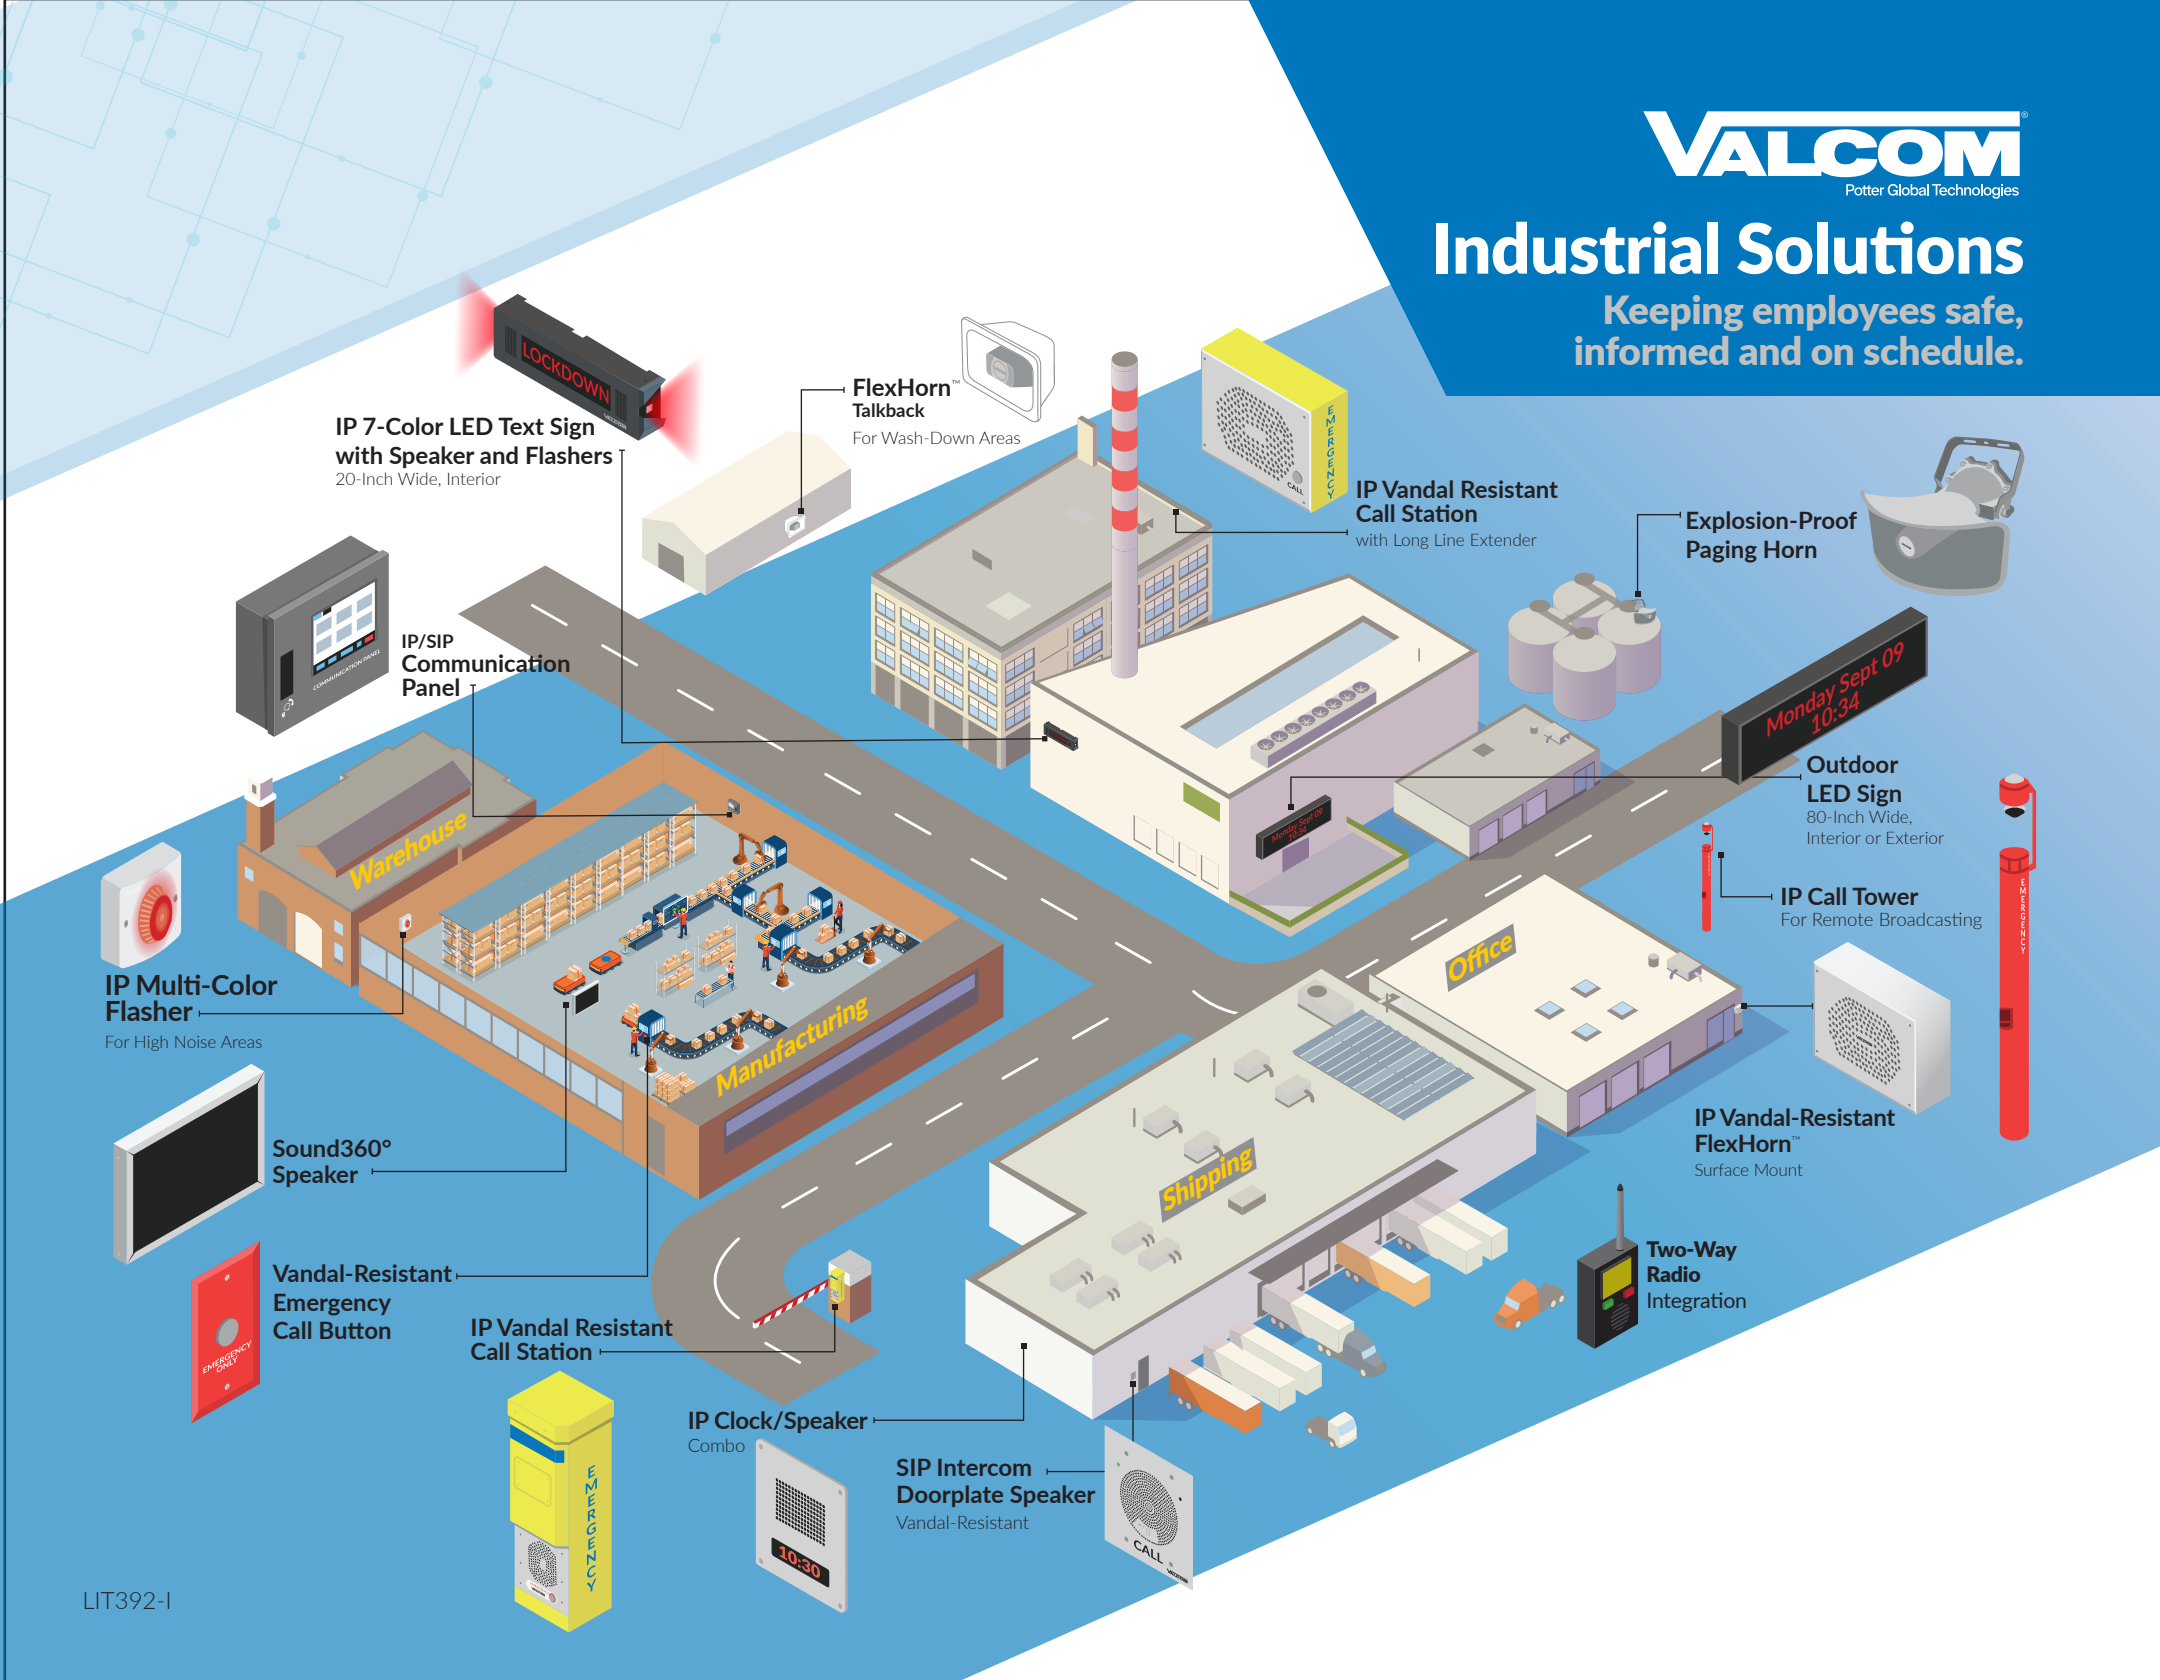
VALCOM
Potter Global Technologies

Industrial Solutions

Keeping employees safe, informed and on schedule.



LIT392-I

Industrial Solutions

Valcom is the glue that ties your communication and safety devices together, providing innovative and cost-effective paging, intercom, and visual messaging communication solutions. Valcom provides these services within a single device/system.

With extensive expertise in various notification technologies, we tailor a solution that fits the hustle of manufacturing facilities, warehouses, and mills to ensure everyone remains on schedule, well-informed, and safe.

On-Premise Alerting Needs

Daily Communication Needs:
Notify employees of scheduled shift changes/breaks, make quick page announcements to employees/visitors, and play music to improve the work environment.

Emergency Communication:
Alert employees of severe weather and general emergencies (e.g. hazmat spills).

Machine Communication:

PLCs/Ancillary Devices: Monitor and alert everyone if a machine is over temperature or goes down.

SCADA Systems: Build the bridge from a SCADA system to Valcom's communication devices.

Valcom Communication Protocols: BACnet/Modbus, Relay Contacts, CAP, API, SNPP, SIP.

Communication with Existing Security Solutions:

Access Control: Automate opening and closing of doors.

Radio Devices: Integrate with Two-Way Radio Devices such as Motorola.

Cameras: Tie into existing cameras. Valcom works with Omnilert and other AI camera vendors.

Existing Analog Devices: Valcom supports hybrid installations.
