College represents a time of newfound independence for many young adults. However, ensuring the safety and security of everyone on campus is an imperative that higher education institutions cannot afford to overlook. Establishing robust campus security measures is a monumental task, effectively notifying students, faculty, and staff members of potential dangers while fostering a sense of security throughout the campus community.

Valcom recognizes that security is paramount in higher education settings. College campuses are bustling with students and staff members moving in and out of buildings at various times, amplifying the complexity of communicating threats that may arise on campus or in the surrounding area. Our emergency notification solutions empower higher education institutions to rapidly disseminate critical information across multiple locations, ensuring swift action in response to any situation.

Public Address: Automate routine announcements and prioritize code calls and emergency alerts.

One Click Simplicity: Send one message to multiple devices with a single click.

Desktop & Mobile Alerting: Send critical information to Android and iOS devices and desktops.

Emergency Notification: Instantly send emergency alerts to areas of your facility.

Scheduled tone: Automate class changes and tones.

System Health: Monitor Valcom system health, troubleshoot maintenance issues.

With extensive expertise in various notification technologies, our solutions include voice paging, message signs, strobes, automated tones, and synchronized clocks – we tailor a solution that fits into the hustle of college campuses to ensure everyone remains on schedule and well-informed.
